# PESERETEVENING NEWS | THE MISSION OF "MORMONISM"

Such the Theme Discussed at the Tabernacle on Sunday.

ELDER KING THE SPEAKER

Says the Plan of Salvation is Unchangeable-All Should Come to A Unity of the Faith.

The gervices at the Tabernacle yes terday afternoon were presided over by Presidnt Angus M. Cannon and the congregation was addressed by Elde William H. King who spoke interest ingly on the mission of "Mormonism.

The choir and congregation sang: Our God we raise to Thee, Thanks for Thy blessings free, We here enjoy.

Prayer was offered by Bishop William B. Preston.

The choir sang the hymn: O my Father, Thou that dwellest,

In the high and glorious place, Elder William H. King was the speaker. He began by explaining the custom among the Latter-day Saints of calling from the congregations those

who were desired to speak. This brought before the people men engaged in different avocations of lif and who during the week, by reason of a pressure of business, had had very little time to devote to the study of theological subjects. The Lord had provided, however, for such emergencies, for He had introduced among men ways and means whereby His word ould be revealed even unto babes and Elder King said "Mormonism" was a

w, yet old religion. Its restoration introduction unto man in this agwas a new thing, yet the principles of which it was made up were exactly those revealed unto humankind in ancient times. The Latter-day Saints be-lieved and declared that the lapse of time did not change truth into error nor did it convert error into truth. The Gospel law was a philosophical one. It was one of evolution, bringing order out of chaos and causing the hu man mind to grasp and comprehend those things calculated to ultimately

bring about true perfection.

The speaker defined "Mirmonism"—
what it was and of what it was made He expressed the fact that it was the expressed the fact that it was the same system of religion as taught by Christ and His Apostles, and the one that was designed to bring peace and happiness to all mankind. It was an evolutionary system of religion, leading from the groveling conditions of earth to spheres celestial in the bingdom of Almighty God. It taught a gradual comprehension of things divine, and would eventually lead to a unity of the faith, by which all men would worship and revere the same

Elder King animadverted upon con ditions prevalent in the earth today. He spoke of the schisms and divisions mong men and the bickerings and trife found on every hand. Such a iton called for a speedy and ef rective remedy. Such a remedy had ocen provided and could be found only in the Gospel of Jesus Christ. The speaker pleaded for a return to

Saints. It had in it all the elements of greatness-it was greatness itself and would make great in the eyes of God all who would adhere to its precepts and teachings. It was a system of re It taught self-abnegation. It taught love, charity and all the principles characteristic of the work of God. It was cosigned to save and exatt and would uring back to the Father all who would subscribe to its holy principles. Concluding Elder King testified that the Latter-day Saints were engaged in the work of God. This was the univer-sal testimony among them. They had possessed of the same knowledge in consequence. They had no war with their neighbors, but desired fervently that all should come unto the Father. The choir sang the anthem:

Praise the Lord all ye nations. Benediction was pronounced by Patriarch John Smith.

# MURRAY MERCHANTS COMPLAIN

Say That Smelting Company is Supplanting American Workmen With Greeks, Italians and Hungarians Who Work for Lower Wages.

Complaints are being made by the foreigners are supplied by a labor unless men of Murray against the agency, which contracts to pay them agiven sum per year and keep them. business men of Murray against the importation of Greeks, Italians and Hungarians by the American Smelting & Refining company to work in the smelters. Merchants declare that their old customers have been supplanted and can no longer patronize them, and that their places have been filled by the foreigners who live cheaply and buy closely. When the old plant closed down the Americans were laid off and when the new works started up they were not re-employed, but their places were filled first by Greeks and then the others named followed.

Not only are the merchants com-

plaining but the American workmen as well, and it is said the managers of

employed in return for a per centage of their wages. A citizens mass meeting has been talked of and the appoint ment of a committee to petition the smelter people to give work to their old employes instead of to foreigners. It is charged that when the American

Smelting & Refining company proposed to build the new plant the owners of the site wanted \$40,000 for it. They were willing to pay \$30,000, and rather than lose the smelters the husiness men got together and succeeded in having the price reduced to \$38,000, and then they raised the \$8,000, which they gave to the company and naturally enough they criticize the present action of the smelter company. The receilpts at the stores have fallen off noticeably and the smelting company will be petitioned of there is a very general complaint at the for relief. #### DR. PADEN'S SERMON

#### Reverend Gentleman Says Orthodoxy Is Not Essential to Salvation.

Rev. Dr. Paden preached last night in the First Presbyterian church on "Is Orthodoxy Essential to Salvation?" He held most assuredly not. Such a claim, said he, certainly did not hold in the Presbyterian church, to which admission was open to all who could say that they loved the Lord Jesus Christ, and expressed a godly sorrow for a past sinful life. As to orthodoxy being a qualification for admission to individual churches, that is a matter for each individual church to settle for The word orthodoxy means, according to its etymology-right think-

#### QUARANTINE AGAINST IDAHO Unless Conditions Change, One May be Established.

It seems quite probable that a quarantine may be established against Idaho, unless conditions change. The state board of health is looking into the matter closely and Dr. Beatty, secretary of the board, is just now paying the subject much attention, and Salina, Utah, comes in for criticism at the same time. At Salina it is reported that quarantine regulations are very lax. and that the authorities are permitting people to attend public entertainments . Beatty has written to the mayor of Salina that if more care is not taken a general quarantine will be declared

In Idaho, particularly at Salmon City conditions are far from good. When the disease first appeared physicians called it the Marila itch, and so caused it to spread all the more. It is said that only recently people have arrived here from now a virtual quarantine against Lembl county

Among the legislative acts that will be requested by the state board from the present Legislature is the appointment of a state medical inspector, whose duty it will be to visit all the towns in the state, inspect their sanitary condition, make recommendations to the lo cai authorities and report to the state board. Dr. Beatty thinks that such an footier will be properly appreciated and favors the appointment one. Other states have them and they have been found to be highly useful. It seems to be the only way to keep contagious diseases from being hidden.

#### THE INDUSTRIAL SITUATION Its Evils Spoken Upon by George E Bigelow of Nebraska.

Under the auspices of the local Socialist party, George E. Bigelow delivered a lecture last evening in the Sunday school room of the First Methodist church. He was greeted with a large audience, and was accorded an attentive and respectful hearing.

Mr. Bigelow halls from the state of

Nebraska and in the last election was the candidate for lieutenant-governor on the Socialist ticket. He was in troduced last evening by Charles Stewart, of this city, and he launched into his theme without any preliminaries. He said the strikes and lockouts and he general unrest were not a cause but an effect. And the chief cause, he affirmed, is the application of steam to all the manufacturing processes. The increase of production so rapidly outstripped the increase in the purchasing power and the result is the accumulation of surplus commodities. The purchasing powers is founded upon the tops, wages stop, and ere long chaos usues. Mr. Bigelow expressed the conviction that another parie will soon

conviction that another paric will soon be upon us, from this very cause.

He quoted Gladstone's statement, that the productive power of the world doubles every seven years, while the population does not double in four times that space. Mr. Bigelow took that statement as a basis for a series of conclusions of a most dismal character, as to the industrial conditions within the next few years. He pointed out how impossible the situation will be before long, when hundreds of thousands of men, women and children could only be furnished employment three or four months out of the year, and then on wages barely sufficient to and then on wages barely sufficient to sustain them during the period they are employed.

Mr. Bigelow wanted to know why he should not participate in an equitable share of the wealth that his own ener-

gued that proposition out to some gued that proposition out to some length, and quoted Senator Fairbanks of Indiana, who in his speech on the Chinese question, held that labor should receive a "fair share" of all it

Mr. Bigelow described further the almost intolerable condition of the laboring man under the present industrial system. He pointed out the evil menaces that surround a family that living in poverty, but he could blame a man for wishing to get all the profit he can out of his business, so long as he is living under a system of

## OAKLEY COAL FIELDS.

Prospects are promising for the speedy development of our extensive coalbeds, by Huntington people. A coal expert, representing the S. P. company, is now in Oakley, having just returned from the coal regions, where he has been making examinations as to quantity and quality of our coal deposits. That the impression was more than favorable is evident from the fact that he has already made an offer to the Oakley Coal company of \$30,000 for a lease on their property, and it is believed that an effort will be made to secure all the leading locations in the district with a view of manning by district, with a view of running in a branch line and extracting the dusky diamonds. The Oakley people have never realized the full value of the immense bodies of coal that lie within a few miles of our very doors. To the S. P. company these coal fields will be a bonanza, as it will give them fuel abundance, saving a long haul over other lines.

# TREATMENT OF FROST BITE

In a \$25 prize essay which Dr. Charles S. Butler, surgeon in the United State S. Butler, surgeon in the United States navy, recently wrote for The New York Medical Jonrnal, he points out that there are two evils against which one must guard. If the affected region remains partially or wholly bloodless from the contraction of blood vessels for too long a period, the tissues will be damaged. If the blood vessels are too suddenly dilated, their cells become paralyzed, and the vessels themselves too much gorged. In either case there is danger of gangrene. For these reasons pains should be taken to let the temperature come up very slowly, and the utmost caution used in giving stimulants. Dr. Butler would not tol-erate them at all except in the direct share of the wealth that his own energe of the wealth that his own energency—as, for instance, when the paimist and astrologist. 15 W. 34 South.

oally.

Dr. Butler addresses himself more immediately to his professional brethren, but it often happens in cases of freezing, as with many other accidents, that other people have the first chance to offer help, and a physician or surgeon cannot be secured for an hour or more.

These surgestions therefore, are of These suggestions, therefore, are of general interest, as is also his further advice concerning proper treatment. Butler continues:

"Ordinarily we can begin treatment upon the patient immediately after he is found or while transporting him to some place for further treatment, by friction, either with the bare hand or with snow rubbed vigorously upon the part. The patient should be placed first in a cold room and the friction continued. When he begins to experience tingling in the member we should take care lest we elevate the temperature too suddenly, thus causing the most exeruciating pain. The amount of pain he experiences is a fair gauge to our success, for it should not be great. This can be controlled by placing the part in iced or cold water from time to ime or by elevation. When sensation begins to return we can build a small re in a room or begin otherwise vate the temperature gradually bring-ing it up to 70 or 75 degrees F.

When the patient begins to feel com-fortable, it is wise to put a flannel roller upon the limb with a amount of pressure, and elevate. will obviate any further tendency toward engorgement.
